

UI/UX Design Brief

AI Recipe Generator

Project Overview

Project Name:

AI Recipe Generator

Platform:

Android (Flutter)

Target Audience:

- Students
- Busy Professionals
- Home Cooks
- Fitness Enthusiasts
- Beginners in Cooking
- Families

Project Goal

Design a modern, elegant, and AI-powered recipe application that enables users to generate recipes using artificial intelligence, discover trending dishes, save favorites, and receive personalized cooking recommendations.

The experience should feel like having a personal AI chef in your pocket.

Design Vision

The application should communicate:

- Warmth
- Simplicity
- Intelligence
- Trust
- Comfort
- Premium Quality

The design should be inspired by modern food applications while maintaining a unique visual identity.

Inspiration Sources:

- Dribbble
- Behance
- Material Design 3

Important:

Do **not** copy any existing design. Use references only for inspiration while creating an original interface.

Design Style

The overall visual style should be:

- Modern
- Minimal
- Premium
- Soft
- Clean
- Elegant
- Friendly
- Human-centered

Avoid clutter and unnecessary decorative elements.

Brand Personality

The app should feel like:

- A professional chef
- A helpful cooking assistant
- A friendly AI companion

The interface should inspire confidence and creativity while cooking.

Color Palette

Primary

Brown

#8B5E3C

Background

Cream

#F6F2EE

Surface

White

#FFFFFF

Primary Text

#2E2E2E

Secondary Text

#7A7A7A

Success

Soft Green

Error

Soft Red

Typography

Preferred Font

- Poppins

Fallback

- Roboto

Hierarchy

- Large Bold Headings
- Medium Section Titles
- Regular Body Text
- Small Supporting Text

Typography should remain clean and highly readable.

Icon Style

Use modern outlined icons.

Rounded icons are preferred.

Icons should remain consistent across the application.

Illustration Style

Food illustrations should be:

- Warm
- Soft
- Minimal
- High quality

Avoid cartoonish graphics.

Image Style

Use professional food photography.

Images should:

- High resolution
- Bright
- Natural lighting
- Warm colors
- Minimal background distractions

Components

Design reusable components for:

- Buttons
- Text Fields
- Cards
- Search Bars
- Chips
- Recipe Cards
- Bottom Navigation
- Dialogs
- Snackbars

All components should follow one consistent design language.

Layout

Use generous spacing.

Maintain visual balance.

Avoid overcrowding.

Cards should have:

- Rounded corners
- Soft shadows
- Comfortable padding

Navigation

Bottom Navigation

Five Tabs

- Home
- Favorites
- AI Assistant
- Saved
- Profile

The AI Assistant tab should be visually highlighted because it is the core feature.

User Experience Goals

The application should be:

Easy to understand

Easy to navigate

Fast

Responsive

Accessible

Visually appealing

Minimal learning curve

Screen Guidelines

Splash Screen

Purpose

Brand introduction

Should include:

- Logo

- App name
- Simple animation

Login Screen

Should feel welcoming.

Include:

- Logo
- Welcome message
- Email
- Password
- Google Sign-In
- Remember Me
- Forgot Password
- Sign Up

Register Screen

Maintain consistency with Login.

Include:

- Name
- Email
- Password
- Confirm Password
- Google Sign Up

Home Screen

This should become the visual centerpiece of the application.

Include:

- Greeting
- Search
- AI Generator Card
- Categories
- Popular Recipes
- Trending Recipes
- Daily Recommendation
- Featured Recipes

Recipe Details

Include

- Large image
- Recipe information
- Ingredients
- Instructions
- Nutrition
- Save
- Favorite
- Share

AI Generator

Allow users to enter:

Ingredients

OR

Natural language prompts.

Example

Create a healthy chicken dinner under 500 calories.

Display:

- Recipe
- Calories
- Cooking Time
- Ingredients
- Instructions
- Tips

AI Chat

Conversation should resemble modern AI chat interfaces.

Features

- User messages
- AI responses
- Typing indicator
- Auto scroll

Favorites

Display saved recipes using modern recipe cards.

Allow:

- Search
- Delete
- Filter

Profile

Include:

- Profile image
- User information
- Saved recipe count
- Generated recipe count
- Settings
- Logout

Micro Interactions

Use subtle animations for:

- Button presses
- Navigation
- Card taps
- Loading
- Favorite toggle
- AI response generation

Animations should be smooth and not distracting.

Accessibility

Ensure:

- High color contrast
- Large tap targets
- Readable fonts
- Responsive layouts
- Screen reader compatibility where possible

Responsive Design

The interface must work well on:

- Small Android phones
- Standard phones
- Large phones
- Tablets

No overflow or clipped elements should occur.

Visual Consistency

Maintain consistent:

- Border radius
- Shadows
- Colors
- Typography
- Spacing
- Iconography

Every screen should feel like part of the same product.

Success Criteria

The final UI/UX should:

- Feel premium and polished.
- Be intuitive for first-time users.
- Highlight AI as the primary feature.
- Encourage users to explore recipes.
- Deliver a smooth and enjoyable cooking experience.
- Be suitable for a professional portfolio or final-year university project.
